FARO®

SCENE Software is Set for an Exciting Update

Think you've SEEN SCENE and know what it's all about? Then think again. Because you haven't SCENE anything yet!

THE LATEST SCENE UPDATE

✔ **Interactive Registration**
✔ **Hybrid Registration**

Interactive registration is a visual step-by-step approach giving users full control over scan connections.

Hybrid registration allows cloud-to-cloud, targets, and survey control to be used together to achieve:

- Faster registration with new scan optimizer
- Improved registration accuracy with interactive and hybrid approach
- Handle projects of any size with new cluster management
- Confidence and clarity of results

Creating stunning 3D visualizations of real-world objects/environments and processing and registering that data has never been easier.

» Use **SCENE** for Architecture, Engineering and Construction
» Use **SCENE** for Public Safety
» Use **SCENE** for Geospatial applications

DOWNLOAD THE SCENE TECH SHEET

Whether for as-built capture and modeling, digital forensic documentation, improved safety planning/failure investigation, or SLAM-based mobile mapping, the new FARO SCENE Software has to be SEEN to be believed.
